

**Opportunities in India
for ASIANetwork Faculty, Students, and Institutions**

In Partnership with the All India Association for Christian Higher Education (AIACHE)

[ASIANetwork](#) has signed a Memorandum of Understanding with the All India Association for Christian Higher Education ([AIACHE](#)), a consortium of several hundred colleges across India. The framework of this agreement anticipates a wide array of potential collaborative activities involving individual and group research projects, student and faculty exchange, joint workshops, meetings, and seminars, teaching programs and consultancies, etc., via in-person and virtual formats. These possibilities for cooperation between ASIANetwork and AIACHE member colleges and universities may take various forms that will be guided by the needs and interests of the faculty and students at each institution.

ASIANetwork facilitates connections that could be pursued by individual or groups of member colleges or faculty. For example, these may give rise to:

- **Student/faculty/administrative staff exchange** programs such as sabbatical or summer residencies, consultancies, program reviews, etc., and student study abroad opportunities of various duration
- **Faculty development programs** such as professional development workshops, study tours, language training, skill sharing, etc.
- **Educational and cultural tours** for students or community members as part of credit-bearing, continuing-education, or other institutional programming
- **Academic programs** such as course offerings, certificate programs, etc.
- **E-resources and online courses**
- **Conferences, seminars and workshops** in topic areas of shared interest
- **Research projects** in all disciplinary areas, including student-faculty projects and faculty-faculty collaborations, virtual or on-site in North America, India, or elsewhere
- **Publications** resulting from international collaborations, via AIACHE journals, ASIANetwork's journal or book series, or other international publishing venues
- Among other possibilities
